/Mortgage S.I. coin, has a verified minted token on the stellar network.

/Key - Mortgage S.I. coin has a fair market value (FMV) /Mortgage S.I. coin has an audience reach of 1M+.

MORTG was soft Launched in 2019 on the ethereum network and subsequently in December 2020 on the stellar network. Mortgage S.I. coin was developed to be an easily recognizable fulfillment, obligation. New milestones include verified swap operations, market trading pairs, liquidity pools and interoperability, with additional token pairs when trading.

Mortgage S.I. coin can be staked, in large real property transactions as a stand alone equity for purchasing, security interest (S.I.), and or earnest equivalent and paired with other cryptocurrencies in pools to generate daily, weekly and monthly trading fees.

The verified token is a private development based in Los Angeles, California utilizing the blockchain and the internationally recognized and accepted spot markets, to facilitate new industry methodologies and private use solutions.

It is not inclusive, of traditional qualifying much like the use of the a flash loan, "MORTG" offers favorable conditions in any market phase allowing you to utilize property as defined by IRS Notice 2014-21 and California Probate Code Section § 6132 (h)(1) Section 798.3 of the Civil Code for one-off and continuous, on the spot transactions to any payee and is inclusive of escrow transactions as evident by widely known Bitcoin and altcoin purchases of real property.

Due to the immutable nature of blockchain transactions once a transaction has been agreed to and finalized its irreversible, hence the buyer, seller and third parties involved are afforded protections.

By moving to the stellar network Mortgage S.I. coin has guaranteed low transaction fees and implemented claimable balances whereby any transaction, including a third party like investors, brokers, or a privy party, can be efficiently secured in the transaction.

The IRS also stipulates virtual currencies (property) can be digitally traded between users and can be purchased for, or exchanged into, U.S. dollars, Euros, and other real or virtual currencies making it a seamless occurrence in escrow transactions.

IRS Notices 2014-21, IRB 2014-16) has determined Mortgage S.I. coin as recognized ordinary income in exchange for performing services and in transactions, using spot/cash markets. Mortgage S.I. coin is legally authorized and can be utilized in any private or industry source of purchasing, transaction fees, remuneration, bonuses and or benefits.

Mortgage S.I. coin (property) can additionally be used in exchange for staking, goods, escrow transactions and utilized in daily life. The IRS further provides if there is not a published value available, then the fair market value of Mortgage S.I. coin (MORTG) received, is equal to the fair market value of the property or services exchanged for Mortgage S.I. coin when the transaction occurs.

Mortgage S.I. coin uses verified order books and recently initiated protocol 18 for liquidity pools to facilitate trades and trading, on select DEX and SDEX exchanges nationwide. Additionally “MORTG” is verified for swapping, into fiat or other real or virtual currencies.

As new supply becomes available you can continue to increase your reserve position, become a new hodler by taking current offers, begin trading and/or facilitate a bespoke transaction for real property utilizing “MORTG”, or uptake the cryptocurrency as a bespoke business payment tool.

Protocol 18 (Automated Market Makers)

The stellar network launched the Protocol 18 which adds native support for automated market makers to Stellar. AMMs have the potential to make liquidity provision an accessible, simple, and inclusive process.

They work a bit differently from traditional order books.

“With an AMM, buyers and sellers trade against a liquidity pool rather than trading against existing orders, others have placed on order books. An AMM uses an underlying formula to value two assets relative to one another.

As trades execute against the pool and alter the amount of each asset it contains, the relative prices shift based on that formula. Anyone can provide liquidity by depositing into a liquidity pool “MORTG” as the base asset and SEK (fiat) as the counter asset on Stellar, it will just take a single operation — and the pool adjusts prices programmatically.

Hence, it removes the need to update orders to manage risk manually.” The user can also create a client facing pool using their own holdings of MORTG/ (CounterAsset) and earn fees every time a trade is executed against the pool.

FYI

What is Base Currency?

In the forex market, currency unit prices are quoted as currency pairs. The base currency – also called the transaction currency (MORTG) - is the first currency appearing in a currency pair quotation, as noted above in “trading pairs” section, followed by the second part of the quotation, called the quote currency (SEK) or the counter currency. The quote currency can be anything you choose.
